

DO YOU HAVE HIV?

Do you feel discomfort in your feet and lower legs?

Consider participating in a clinical research study.

Over time, HIV and its treatments can damage your nerves, especially the nerves in your feet. Researchers from **PalmTree Clinical Research** are currently studying whether a new study treatment could help prevent and treat this nerve damage.

You may be eligible for this study if:

- ✓ You have HIV
- ✓ Are aged between 18 and 80
- ✓ You feel numbness, tingling, tenderness or pain in your feet and legs

If you are interested in learning more about this clinical study, please contact the research team at the number below.

Call or email us at:

(760) 778-7799
contact@palmtreeclinical.com

Monetary compensation will be given for your participation as well as testing results.
